Minutes of Meeting (MoM)

Project: Trumen
Date: 9 OCT 2025
Attendees: Mr. Narayan
Prepared By: Mr. Shivpal

1. Increase the size of the company logo in the header to match the one used in the previously shared quotation.

2. In the header, when printing the quotation, the website name appears in the next row—it should appear on the same line.

3. The default text "Offer for" in the quotation subject should be fixed.

4. In the product configuration table, reduce the width of the "Unit Rate" column and make it the same width as the "Total" column.

5. Remove the gap between "Specification" and its "Description"—only keep a gap between "Model" and "Specification".

6. In the T&C section, the 10th point should display the text provided at the time of quotation creation.

7. The quotation should display the name, mobile number, and email of the user who created the offer, and the given address should be updated accordingly.

8. While creating a quotation, add a new field to enter Pressure, and display it in the PDF on the right side of the Application, In Product Configuration Table.

9. In the Product Configuration Table, align the INR and USD values (currency values) to the center.

✅ **Acknowledgement Requested:** Please confirm the above MoM so that our team can proceed with updates accordingly.
